

WEAVE FLOW

AI-powered intelligent document processing for healthcare

Flow by Weave Cloud Solutions is an advanced Intelligent Document Processing (IDP) solution designed to streamline healthcare administration. Using artificial intelligence, Flow enables healthcare providers to focus less on paperwork and more on patient care.

A digital workforce to support your team

As your digital workforce, Flow captures incoming files and uses AI to classify document types and extract data in seconds with greater than 95% accuracy. Flow's digital workers automatically route documents to the right team for action, before ultimately sending them across Weave's secure delivery network to the correct system of record.

Key Features

- Automated document ingestion: Seamlessly captures incoming documents, including faxes, scans, and digital files
- AI-driven classification: Utilizes GenAI and LLMs to accurately classify documents, reducing manual sorting
- Data extraction: Extracts relevant information from structured and unstructured documents, including handwritten notes
- EHR integration: Integrates with major electronic health record systems to ensure smooth data flow
- Secure and compliant: Ensures data privacy and compliance with healthcare regulations

Benefits

Increase administrative efficiency and reduce manual data entry by up to 80%

Improve data accuracy and minimize human error

Deliver better patient care and enable healthcare teams to dedicate more time to patients

Decrease operational costs by automating routine tasks

"Implementing Weave Flow has transformed our administrative workflows, allowing us to process documents faster and with greater accuracy."

Director, Patient Access at a mid-sized Ambulatory Surgical Center

About Weave Cloud Solutions

Weave Cloud Solutions is committed to transforming healthcare administration with innovative AI technologies. Our solutions are designed to address the unique challenges of the healthcare industry, enhancing operational efficiency and patient outcomes.
